

Royal Television Society

has offset the estimated GHG emissions associated with the
London Convention 27th September 2022.

RTS has offset 60 tonnes of CO₂e¹

through the Pacajai Reduced Deforestation (REDD+) project in the
Brazilian Amazon (VCS 981)

and

planted 60 trees in the UK

thereby offsetting carbon emissions,
helping to prevent climate change
and creating space for wildlife

Certificate issued: 20th September 2022

www.carbonfootprint.com

John Buckley, Managing Director,
Carbon Footprint Ltd.

¹ Based on the assumption of 150 kgCO₂e per attendee.

**Planting native broad-leaved trees,
offsetting carbon emissions
and providing wildlife habitats**
